

Planning manager

Large Industrial Project (M/W)

Actual deputy of the project manager, you want to become responsible for reaching the timeframe objectives within the framework of large engineering projects in the industry.

Missions:

- Ensure the elaboration and the deployment of the planning for industrial projects,
- Ensure the respect of the project timeframe and the application of methodologies within teams that are often international and cross-disciplinary,
- Manage, in agreement with the project manager, the strategy to respect the project deadlines,
- Put in place the reporting required to ensure the good execution of the project,
- Participate to Lessons Learned formalization,
- Animate the planning dimension of a projects portfolio or of a program.

Profile of the candidate:

You graduated from a high school of engineering, and have a significant experience in complex industrial projects planning (automotive sector, avionics ...).

You speak business English, and possibly German (it would be an advantage).

Mastering the PRIMAVERA V6 tool would be also an advantage.

Meticulous and professional, you really have the management skills required for working in a complex and transversal environment whose organization is constantly changing.

Tactful and enthusiastic, you show excellent interpersonal and communication skills, a natural leadership and a real motivation to support ambitious projects teams on their way to success.

Localisation:

Job position to be filled in Paris. Geographical mobility required (the missions entrusted to our company are realized in France and abroad).
